Pintail Drive Boardwalk

State Project No. 745-12-0003

Cameron Parish

Total Estimated Construction Cost is \$ 1,175,000

Project Federal Recovery Funds is \$457,000

Project is located off Pintail Drive, just above the Intracoastal Canal.

This project is intended to provide access to view wildlife and vegetation in the existing marsh. Of particular interest is the opportunity to monitor the reestablishment of grasses following destruction by salt water intrusion from Hurricane Rita's storm surge. To facilitate this function, cantilevered observation areas, or decks, have been provided. These decks extend off the boardwalk at right angles on selected quadrants of the route. Views along three of the four compass points are provided, outside of the boardwalk travel way.
